

**25th Annual MTUG Telecommunications and Computer Networking Conference**  
**May 31<sup>st</sup> 2012**

**KEYNOTE SPEAKER**

**Lance Berberian**

Chief Information Officer, IDEXX Laboratories

**The Impact of Technology on the  
Rapidly Evolving Veterinary Healthcare Industry**

Do you have a loved family member with four legs or a pair of wings? This presentation will provide an overview of the technology that IDEXX Laboratories leverages to enhance the health and well-being of these important family members. This is made possible by the integration of a wide array of technology including networking, telecommunications, information systems and data along with the science of healthcare.

**BIO**

**Lance Berberian** is the Chief Information Officer (CIO) of IDEXX Laboratories, a publicly traded company and global market leader in diagnostics and information technology solutions for animal health, water and milk quality, headquartered in Westbrook, Maine. Prior to coming to IDEXX in 2007, Berberian served as President of Kellstrom Defense Aerospace, a division of Kellstrom Industries serving the defense and commercial aviation marketplace, and as CIO of Interim Healthcare and of Quest Diagnostics. Berberian holds a BA in Business Administration/Information Technology from Rutgers University/Thomas Edison State College.
